

PUBLISHER'S FOREWORD

By publishing the *English–Hungarian Financial Dictionary*, Akadémiai Kiadó has extended its series of specialist dictionaries with a long-awaited new publication. It is an essential reference book for experts, translators – general or specialised –, students preparing for specialised language exams, people working in finance or trade, or anyone trying their hand at financial texts.

The two-way dictionary – comprising an English–Hungarian and a Hungarian–English part – contains over 80,000 entries from the fields of finance, banking, stock trade, accountancy, auditing, insurance and taxation. The English–Hungarian part includes more than 45,000 headwords and over 100,000 lexical units. It is followed by the Hungarian–English index in the second half of the dictionary, whose 35,000 entries largely contribute to the easy translation of Hungarian texts into the target language.

As English is considered to be the mother tongue of financial, banking and commercial life, our publication is definitely a useful help for specialists working in these fields. People who are new to finance should also not be scared off by the multitude of unknown English words they encounter, since this financial dictionary will surely enable them to understand and translate serious specialised texts accurately and problem-free.

We honestly hope to hand you over a helpful and efficient working tool.
